EXAMINER'S COMMENT

Election/Restrictions

1. Claims 1-4, 6-8, 11-31 and 36 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), Claims 32-35, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.
2. Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on June 17, 2008 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, Applicants are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1-4, 6-8 and 11-36 are allowed.

Examiner's Statement of Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance: Based upon the amendments made to the claims in the amendment filed on December 22, 2008, the Japanese Application Publication of Shunji et al. (JP 2001-302936; hereinafter "Shunji") is now the closest prior art to that which is claimed in the instant application. However, Shunji fails to teach or suggest a heat-decaying material comprising a polyoxyalkylene resin and a decomposition promoter. In addition, Shunji fails to recognize that the oxygen atom content of the material is a result-effective parameter in the claimed heat-decaying material, in that the claimed oxygen atom content results in the material being more efficiently decomposed upon heating.
5. Additionally, the U.S. Patent of Sakaguchi (7,195,720) is close prior art to that which is claimed in the instant application. However, Sakaguchi fails to teach or suggest a heat-decaying material comprising a polyoxyalkylene resin in combination with a decomposition promoter. Likewise, Sakaguchi fails to recognize that the oxygen

atom content of the material is a result-effective parameter in the claimed heat-decaying material.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David J. Joy whose telephone number is (571) 272-9056. The examiner can normally be reached on Monday - Friday, 7:00 AM - 3:30 PM EST.
